Indiana Opposed to Grant Gen. Milo S. Hascall, a candidate for Auditor of the State of Indiann, publishes this morning in anothers column of the Tribuse, a letter addressed "to the Republicans of Indiana," declating that if Grant is nominated at Chicago, he (Gen. Hascall) does not wish to be nominated on the State ticket, as under such circumstances there could not be the slightest chance for either the Republican National or State ticket to carry Indiana. Gen. Hascall is emidd and courageous enough to state what he helicyces to be, and what unquestionably is, the trath-wiz, that with Grant at the head of the Republican Fusidential ticket, a place on the Indiana State ticket would not be worth having; and in such an event, Gen. Hascall wishes it distinctly understood that does not desire, and will not accept, the nomination for State Auditor.

How it is to be Taken—Duties of Citizens in Relation to It.

The actual work of enumeration for the teath census will begin on the lat of June. Outside of citics having 10,000 inhabitants the work will extend throughout the month of June. In cities having 10,000 inhabitants it must be completed in two weeks, that is by June 14th. It is the duty of enumerators to visit personally every dwelling in their district, and to obtain all the information asked for on the printed scheduls. By "dwelling" is meant any kind of habitation, temporary or permanent. There are five general heads under which the questions to be answered are classified. These are population, agriculture, manufactures, social statistics, and mortality. Among the facts to be ascertained in the enumeration of the population are the following:

"Name of street; number of house; name of each person in the family; color, sex and age of each person; relationship of each person to the benal of the family; what persons are single, married, widowed or divorced, and who, if any, were married during the census year; occupation of both males and founds: number of months any person has been unemployed during the census year; sickness or disability of any person at this time of visit; whether there are any blind, deaf, dumb, idiotic, insune, mained, crippled, or bed-raiden members of the family; how, many attend school; how many, if any, cannot read and write; the place of birth of each person, and the place of birth of his or her father and mother." All persons will be included who are living June 1, or who may die between that time and the completion of the census; but children born after June I will be omitted.

By the Fourteenth Section of the act of Congress, approved March 3, 1879, it was provided that each and every person more than 20 years of age belonging to any family residing in any enumeration district, and in ease of the absence of the heads and members of any such family, that any agent of such family in the arrious particulars required by haw, an

It is the duty of an Enumerator, in the exercise of his authority, to visit houses and interrogate members of families residing therein, and make use of great courtesy and consideration in so doing.

The law requires a return of each blind, deaf and dumb, insane or idiotic, or crippled person. Special pains should be taken to get the exact facts of this sort, answers being rejected that the enumerator may have excellent reasons for believing to be false.

The several subjects for inquiry are: Population, agriculture, manufactures, social statistics, and mortality; the census year beginning May 31, 1879, and ending June 1, 1889.

There are seven supplemental schedules relating to "defective, dependent and delinquent classes."

Each census enumerator is furnished with a pamphlet of twenty pages, defining his duties and providing details minutely covering all points upon which he may be called to decide.
